# Summary

Target involved jumbled land features  
integrated w/ a structure. Color accents  
w/ land are beige, white, grey, sepia  
tones, ochre, plus glacial, shaded  
areas. Area is breezy, fresh, echoing, seems  
high, elevated, raised up, sheer, escarpment.  
Structure has an overhanging aspect, and  
part seems to project out over a  
drop. There are significant stockades of  
glassy, clear, translucent sections. AOLS  
of boulders @ Lake Tahoe, and the Grand  
Canyon walkway were fairly pronounced.

post-session reflections.

Session felt exciting, and "on". I think I was in the ballpark - though a couple of stray ADLs kept intruding. I'm going for broke here and guess 8 on a scale of 10.
